Title: ShareNest(Connecting Communities through Shared Resources)

Problems:

- Wasted resources: We buy items used only a few times, cluttering our homes and wallets.
- Limited access: Finding specific items to borrow can be challenging, especially within communities.
- Disconnection: Traditional ownership models weaken community ties and discourage sharing.

Solution:

ShareNest is a peer-to-peer rental platform that empowers communities:

- Request anything: You can request any item you want, which will further send as a notification to all the users within your chosen range.
- Community-driven lending: Borrow from neighbors and build trust within your local network.
- Transparent transactions: Secure platform with clear pricing and communication fosters confidence.
- User-controlled access: Choose your preferred lending circle for comfortable and familiar borrowing.

Technology:

- Frontend: React js
- Backend: Node js(with express js framework)
- Tools: Webpack, JWT and git.
